

VERIFIED PETITION FOR DISCLOSURE OF PUBLIC RECORDS

Riverton Water Alliance v. Riverton Water Authority
Case No. RV-CV-2026-00502. Filed February 6, 2026.

The Alliance requested scoring rules, validation reports, error logs, and staff instructions related to contract CTR-2026-021 with Harbor Analytics. The Authority produced the signed contract and 312 pages of email but withheld the scoring rules as a trade secret.

Petitioner alleges that the rules determine whether household lead-test results receive immediate manual review and therefore operate as public policy rather than merely vendor software.

REQUESTS AND RESPONSE

The records request was submitted November 25, 2025. Records officer Hannah Price acknowledged it on December 1 and estimated production by December 22. The Authority produced its first batch on January 9, 2026.

On January 16, deputy director Evan Bell invoked the trade-secret exemption for 41 pages supplied by Harbor Analytics. Harbor submitted a declaration from chief scientist Nora Vale stating that disclosure would reveal proprietary matching weights.

The Alliance asks the court to review the withheld records privately, order disclosure of any instructions used by public employees, and award reasonable attorney fees. It does not seek customer names, addresses, or individual laboratory results.

Verified by Maya Okafor, executive director of Riverton Water Alliance, under penalty of perjury.
